

Establishing the Register

CHALLENGE

Fractal Dimension was hired by the regulatory body that establish a system for monitoring chemical products to make analysis of the actual building, propose options for improving the applications, as well as to establish proposals for further development according to the needs of the appeared.

Do contact with us has come at a time when he stood out agreed support from the company that has established an information system. users was unhappy with the way they removed the deficiencies and limitations which had applications.

APPROACH

Familiarizing themselves with the business processes of customers, as well as realized application and new requirements to which the user would like to within a set of the form processing applications expert team of Fractal Dimension is to determine the following :

Architecture implemented application is inconsistent with the business processes , ignored the Weather data structure is not implemented filtering options Log the specified criteria , the data model does not contain all the required data not provide functionality change status company , is not achieved the ability to monitor the status of the case, there is no possibility of entering registration of chemicals , data is not "user friendly" , input composition chemicals does not treat all the possibilities for information on substances , although it was Initially set request , there is no possibility of entering multiple attachments to a file , there is no functionality to export data into a format which could be further used for needs anallize , statistics , calculation , and second, there is a report that would be useful for the issuance of the decision , the decision can not be generated from the application, not The possibility of insertion of the final scanned version of the signed decision.

RESULT

Fractal Dimension is proposed to terminate the contract with the current supplier of application. By this proposal we have come since we comprehend all defects registry established and the inability to further develop particular Keeping in mind the requirements of the new functionalities which would be impossible implemented in an existing application. Fractal Dimension's re-business process analysis, taking into account user activity and structure future requirements, designed by the architecture and solutions proposed expert team implementation. Project cost of making a new application was three times lower than Initially set the contract value with the previous perpetrator in self contained all emerging business requirements.
